

CAREER OPPORTUNITY – APRIL 2021

THE Chem Lab Ltd. is a top quality analytical testing laboratory founded in 2008 specializing in the analysis of transformer and other high voltage equipment electrical insulating fluids.

THE Chem Lab Ltd. is strongly focused on the quality of reported data and on a high level of customer service and support.

THE Chem Lab Ltd. invests heavily in state of the art instrumentation, quality facilities and highly skilled staff members.

If you are interested in joining THE Chem Lab Ltd. please apply directly to: careers@thechemlab.ca

JOB POSTING FOR FULL-TIME POSITION OF CHEMIST (Minimum 12 month position with possible extension)

THE Chem Lab Ltd. is seeking a motivated team member with experience in laboratory/scientific analysis to join a customer-focused and safety-oriented team. The candidate must be able to work in a fast-paced environment while strictly following safety procedures, management directives and operating protocols.

Primary Responsibilities / Primary Employee Expectations Include:

- Performing required duties as they relate to physical, electrical and chemical testing of liquid insulating samples
- Following of operating procedures, methodologies, management directives, and safety procedures
- Electronically logging sample data in an efficient and accurate manner
- Maintaining logbooks and ensuring that all quality control elements are performed and QA requirements are met
- Monitoring workflow of samples through the laboratory while noting sample and testing priority
- Becoming proficient with a limited number of testing procedures and maintaining notes of anomalies and non-conformances
- Ensuring that work areas are clean, organized and safe
- Performing basic Maintenance of test equipment as per established protocols and operation of equipment in a safe manner
- Preparation of analytical standards, solutions and reagents
- Communicating clearly and consistently with co-workers as required
- Demonstrating dexterity when handling glassware and equipment
- Production of quality data and a consistent commitment to quality

Secondary Responsibilities / Secondary Employee Expectations Include:

- Appropriately disposing of waste and providing housekeeping support as required
- Monitoring supply levels and notifying supervisor or manager of required materials/consumables
- Supporting coworkers throughout the laboratory as required
- Other duties as assigned

Qualifications/Skills:

- Post-secondary degree or diploma in Chemistry, Science or a related discipline.
- Strong background and interest in Chemistry and general science, laboratory experience is an asset
- Ability to effectively problem solve
- Experience handling chemical, or specifically petrochemical, related materials is an asset
- Strong mathematical skills including manipulation of scientific units and measures
- High degree of manual dexterity and coordination
- Strong verbal and written communication skills
- Strong computer skills: knowledge of MS Excel™ formulae and spreadsheets is a strong asset
- Additionally, it is beneficial for the candidate to be:
 - Energetic, and able to learn quickly
 - Reliable and able to transpose data accurately
 - Effective at managing personal time resources
 - Self-motivated, reliable and have strong organizational skills.
